

Where to Get Started

If you're not into coding and want to play with some feature demos, head over to the TilePlus Extras folder. Each demo has its own documentation in text or markdown format.

The demo program doc files can also be found [here](#).

If you want to use Tile+Painter: it has a short "Quick Guide". Clicking the '?' button in Painter displays a quick summary right in same window.

Most of the other documentation is online. The menu item 'Tools/TilePlus/Docs' opens a browser at the documentation website.

- Painter User Guide
- Toolkit Programmer's Guide

The API reference (zip file) can be found in the TilePlusExtras/Documentation folder and can be downloaded from the website.
